

Do you travel to faraway places?

Do you just want to take a picture?

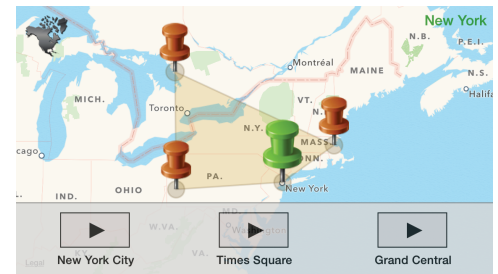

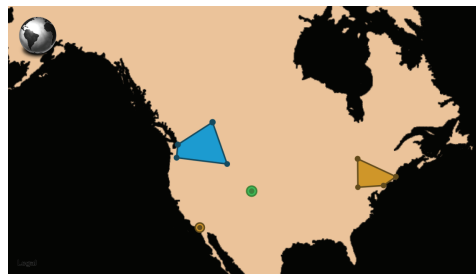

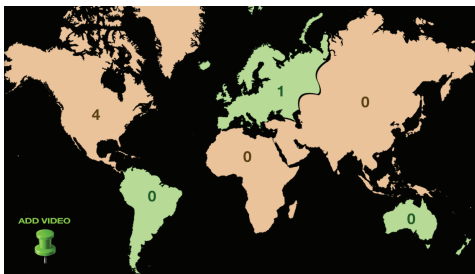

Or, do you want to record the sights and sounds of waterfalls? Of mountaintops, landmarks, or other unique places.

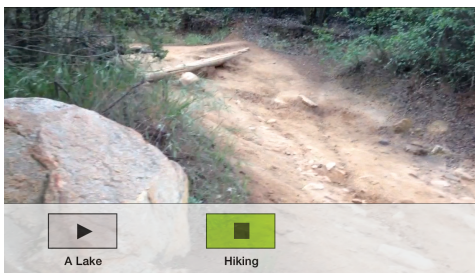

RecordMyTrip

Available on the Apple App Store

SAN DIEGO - JUNE 30, 2014 - Available today, the app RecordMyTrip, is the video journal that groups all your videos for each trip together so that you can re-live or re-tell your adventures.

RecordMyTrip provides an interactive map that zooms from a world level, with total number of trips, to a continent level, showing the paths of each trip. Finally, zooming to the trip level, showing the videos at each city.

RecordMyTrip lets users playback videos by city. After choosing a city, the videos show up in a horizontal list at the bottom of the screen. Playing a video, and switching between videos, is easy using this horizontal list.

RecordMyTrip has a simple recording interface. Record video with either the front camera or back camera. Then add a short description for the video to help you remember what was recorded.

Finally, you can export all videos. Using the iTunes application, connect your iPhone or iPad to a PC or Mac. The files will be downloaded into folders named by the city and date.
